Time Accounting

Time spent per Sprint

We spent on average 33.61 hours per sprint which is close to the intended 34 hours. Due to additional work in other modules and personal appointments during Sprint 6, we precompensated the missing work in Sprint 5.

Time spent per Component

As intended, we spent the most time on the prototype. The management that includes project and sprint planning, standup and advisory meetings, as well as infrastructure tasks, took approximately a quarter of the project budget. The final submission document and the concept paper overlap because they are submitted together and can therefore not be isolated completely.

Estimated cost

Using the hourly wage from the module Software Engineering 2, the total project costs would be $40581\ \text{CHF}$ in practice.

Time spent per Person
